

Students in class doing practical lesson. Just small room but they do wonders in there.

STUDENTS OF ST. MAGDALENE TRAINING CENTRE ARUSHA – TANZANIA.

Each one with her book notes besides her trying to follow the measurements, drawing with the tailor's chalk before cutting. Not everybody can have a table for cutting so some use the floor down to manage their work.

A very hard-working Teacher Elizabeth showing the student how cut properly the material with the right measurements.

Thank you for empowering these girls. We appreciate so much for your help and support. May the Good Lord continue to Bless you always.

THANK YOU SO MUCH!!

Each one is busy to finish faster so that can stitch more dresses. The more speed of the student, the more the dresses she can stitch. When each one display her work, you can some have more and some have less. So always there is a competition among themselves.

Cookery class just outside where there can have more space to view what the teacher is explaining since our kitchen is just small room. Here everyone is able to see clearly and hear the explanation.

They do learn how to make Cakes, Samosa, Chapati, Burns and all kind of bites and snacks. We prepare them to become self-supportive in their daily life. When they go back home they make all these things and sell, so that they can afford their living and that of their families.

For cookery we divide them in small group at one time so that to ease the lesson better.

Some become more expert in Stitching, another more expert in cooking but all are doing very good using their God given talents to make their future better.
